This vinyl bag is designed to snugly fit your 2005 removable targa top panel to protect it during inside storage or in the rear compartment of your Corvette.

Please handle your targa roof panel carefully to avoid dropping it or cracking the edges. It is recommended that you have someone help you during removal and storage of your top panel.

The vinyl bag will fit snugly the first few times that you put the top panel into it. After a few times, the vinyl will stretch and conform to the shape of your top. During cold weather, take the panel bag inside to warm up the vinyl material for ease of insertion.

STEP 1.

Lay the bag face down with the flap open on a covered table or soft surface. Insert the targa roof panel into the opening of the vinyl bag starting with the rear end of the roof panel so that the square ends of the roof panel will be exposed in the open corners at the end of the vinyl bag. The arched top of the roof panel should be on the same side as the top of the vinyl bag with the velcro flaps on it.

STEP 2.

Once the top is slid into the bag (remember, it will be snug the first few times or when it is cold), pull the flaps with velcro over the rounded end of the roof panel and attach to the velcro closures.

STEP 3.

The openings on all four corners allow the top to be locked into the rear hatch area while in the bag.

STEP 4.

Clean the outside vinyl material of the bag with a mild soap and water, and it can be treated with a vinyl cleaner and conditioner if you wish. Do not machine wash the entire bag.
